

Wise Colon Cleanse

For Candida and Parasite Cleanse

INFO SHEET

- Best formula in the market to kill intestinal yeast, bacteria or parasite overgrowth.
- This formulation was created by a Naturopathic Doctor after treating thousands of patients over 18 years with digestive tract problems.
- The capsules are delayed release which ensures that 100% of the medicinal ingredients get delivered to the gut where the microbes are- nothing gets lost in the stomach area.

Frequently Asked Questions?

What is dysbiosis?

Dysbiosis is an imbalance of the flora in your digestive tract. We have trillions of microbes in our gut such as bacteria, fungi, viruses and even parasites. But they should all be living together in balance. The problem arises when something disrupts this balance and we end up having too little of the good bacteria and too many of the bad ones such as yeast (candida), parasites or bad bacteria.

What are some of the causes of dysbiosis?

The more common things that can disrupt our gut flora are:

- Use of antibiotics
- Use of proton pump inhibitors or antacids (medication used for acid reflux or heartburn)
- Use of oral synthetic hormones (such as birth control pill or hormone replacement therapy)
- Use of oral steroids or prednisone
- Diets high in sugar, carbohydrates and yeast (breads and beer).
- Stress!

What symptoms can dysbiosis cause?

The more common symptoms of dysbiosis are digestive such as stomach upset after eating, indigestion, acid reflux, heartburn, slow digestion, bloating, gas, lower abdominal pains, constipation or diarrhea.

However, these digestive problems can lead to many other systemic concerns such as problems losing weight, sweet cravings, foggy thinking, fatigue, depression, yeast infections, bladder infections, allergies, headaches, eczema, psoriasis, chronic sinusitis, autoimmune imbalances, joint and muscle pain.

FAQ

Wise Colon Cleanse

For Candida and Parasite Cleanse

How was the formulation from Wise Colon Health created?

Dr Sandra Miranda, ND has treated thousands of patients with digestive tract problems during her 18 years of practice. Using a specialized functional lab from USA, she has been able to identify from many patients what microbes are present in their digestive tract and which natural agents would best kill the specific strains found. The herbs included in this formulation are the ones that are always identified as being the best ones to kill the most common strains of harmful bacteria, yeast and parasites found in most patients.

Why are the capsules in Wise Colon Health delayed release (DR)?

Delayed release means that the capsules are not going to open until they get to the colon. This will ensure that the contents (herbs) will be released in the gut where the harmful microbes usually are. This increases the effectiveness of the formulation and speed at which the yeast or parasites can be eliminated.

Ingredients:

1 delayed release capsule:

- Olive Leaf (2:1) 500 mg - 6% oleuropein..... 250 mg
- Caprylic acid (Magnesium caprylate) 125 mg
- Grapefruit Seed Extract (4:1) 50 mg
- Black Walnut Hulls (4:1) 600 mg 150 mg
- Peppermint (10:1) 1000 mg 100 mg

Suggested Use: Adults take 1 capsule 2 x day. Take a few hours before or after taking other medication or health products. Consult a health care practitioner for use beyond 14 days.

Caution: Consult with a health care practitioner if you are taking diuretics or cardiac medication, you have a kidney disorder, hiatus hernia, gastroesophageal reflux, gallstones, anaemia, fecal impaction, symptoms such as abdominal pain, nausea, vomiting or fever. Reduce or discontinue use if you experience abdominal pain, cramps, spasms, and/or diarrhea or a hypersensitivity reaction to the product. Allergic reactions can occur in people allergic to plants of the Oleaceae family (olives), walnuts and pecans.

Contra-indications: Do not use if you are pregnant or breastfeeding, if you have abnormal GI constrictions, intestinal blockages, atonic bowel, appendicitis, IBD (Crohn's or ulcerative colitis), abdominal pain or unknown origin, undiagnosed rectal bleeding, severe dehydration, hemorrhoids, heart disease, kidney or liver disorder, diabetes or edema or taking diuretics, corticosteroids or licorice. Stop use and seek medical attention if you experience dizziness, confusion, muscle weakness or pain, abnormal heart beat and or difficulty breathing.

Non-Medicinal Ingredients:
Vegan delayed release capsule
